

G-TEK MF405

PORTABLE STEP GENERATOR MULTI FREQUENCY

Step Generator Multi Frequency is an adjustable sine wave generator and pulse generator.

Sine waves can be adjusted for consecutive expenditure from low to high frequency and amplitude that can be adjusted so that the clipper does not occur.

The machine uses microcontroller and LCD display. Crystal Tx as the best frequency source so get good stability.

Pulse can be set up to 250sec. Input data using the software so much easier to use and unchanged

SPECIFICATION

Type	: Portable	Output voltage	: Max 2.5V, Programmable
Input entry	: Programmable	Impedance	: 50 Ohm
Output	: Pulse, Saw, Rev saw, Triangle, and Sine	Frequency Range	: 0.02s - 50 Hz
Data Range	: Programmable	Power Supply	: Internal Battery 9V - 12V
Interval	: 5 - 250 Sec		
Period Range	: 5 - 250 Sec
