

PRESSURE TRANSMITTER

Precision compensation technology design, sensitive components, stable and reliable.

3 different pressure ranges for you to choose, enough to meet your basic need.

Light weight and small dimension, convenient to install and operate.

It has complete surge voltage protection function.

Widely used in oil tank, gas tank and diesel tank to detect oil, fuel, diesel, gas, water or air pressure.

SPECIFICATION

Power Supply : 12 -24 VDC (10 - 30 VDC)

Type : Air Pressure Transmitter

Accuracy : 0.1%FS; 0.2FS; 0.5 %FS

Distance : 0-1.4mm, 0-2.8mm, 0-5.66mm

Output Signal : 4-20mA, 0-5V, or 0-10V

Measuring Range : 500 - 1300 hPa

Temperature : $-7 \leq 350^{\circ}\text{C}$
